EDUCATION

Noida Institute Of Engineering And Technology

2022 – 2026

B.Tech - Computer Science and Engineering(Artificial Inteligence)

Greater Noida, Uttar Pradesh

Data Scientist & Machine Learning Enthusiast | Leveraging Data-Driven Insights to Build Intelligent Solutions.

TECHNICAL SKILLS

- Machine Learning
- Data Science
- SQL
- Python
- Deep Learning
- Tableau

EXPERIENCE

Intern at IIT Bhubaneswar

March 2023 - June 2023

Role – Machine learning Model Development

Gurugram, Haryana

- Completed a Machine Learning internship at **IIT Bhubaneswar**, gaining hands-on experience in advanced algorithms and model development.
- Worked on real-world projects involving data preprocessing, feature engineering, and predictive modeling.
- Utilized tools like **Python, TensorFlow, and Scikit-learn** to build and optimize machine learning models.

Intern at Coding raja

March 2023 - June 2023

Role – Data Analysis

Gurugram, Haryana

- data analysis using **Python, SQL, and Tableau** to derive insights and improve decision-making processes.
- Developed and maintained dashboards for real-time data tracking and performance monitoring, improving operational efficiency.
- Collaborated with cross-functional teams to **clean, preprocess, and analyze large datasets**, delivering actionable insights for business strategy.

PROJECTS

Movie Recommendation System | 2023 - 24

- Built a movie recommendation system using collaborative and content-based filtering to suggest personalized movie choices.
- Utilized **Python, Scikit-learn, TensorFlow, and Flask** to implement and deploy the system with a user-friendly interface.

Deep Fake Detection | CNN RNN LSTM 2023 – 24 (Selected in hackathon)

- Developed a Convolutional Neural Network (CNN) model** for analysing individual frames of videos to detect deepfake content, ensuring precise identification of manipulated images.
- Implemented image pre-processing techniques** to enhance frame quality, including normalization and augmentation, which improved model training efficiency and accuracy.

WhatsApp Chat Sentiment Analysis 2024

- Built a WhatsApp sentiment analysis tool to understand and classify emotions in conversations.
- Used machine learning to analyse chat data and uncover meaningful insights.

CERTIFICATIONS

- Machine learning - Udemy
- Data Science - coding raja (Internship)
- Artificial Intelligence – 1stop (Internship)
- Deep Learning - Coursera

Achievement

- eLitmus Test Score – 93.17 percentile

EXTRACURRICULAR

- Participate in hackathon(SIH)

2023,2024
